

Goole Training

Nutrient Management Planning (NMP)

24 & 25 January 2018

Cost £395 + Vat Tutor Jim Lewis

To include all training materials, lunch & refreshments

To be held in the Selby/ Doncaster area

This course aims to prepare FACTS Qualified Advisers (FQAs) to manage the challenges of the Water Framework Directive, greenhouse gas mitigation strategies and soil protection, whilst also improving farm profitability. In order to maintain FQA status, current advisors have to complete this training within 2 years from the date of their original FACTS qualification.

The subject areas covered will include the following:

- **Crop nitrogen utilisation and efficiency**
- **Managing farm phosphorus**
- **Techniques for in-field nutrient management**
- **Efficient use of manures and organic materials**
- **Environmental regulations and policies**
- **Fertiliser Industry Assurance Scheme (FIAS) and farm security**

The course is delivered over two days, using participatory lectures and case study work.

Following the course and to retain FQA status, all students are required to take an on-line assessment consisting of multiple-choice questions.
